The EPGY Summer Institutes are two to four week residential programs for academically talented and motivated middle and high school students. The Summer Institutes provide a truly unique opportunity for participants to pursue their intellectual curiosity and meet others who share their interests and abilities.

**Apply for Summer 2011**

Application materials, deadlines, and program information for Summer Institutes 2011 will be available in December 2010. Applications are reviewed in several rounds; application deadlines are in January, February, March and April for the following summer. Applications are accepted until all seats are filled.

Limited financial aid is available. Members of under-represented groups are encouraged to apply.

**STUDENT LIFE**
The EPGY Summer Institutes integrate academics and social activities into every aspect of the program. Students are encouraged to have fun while learning and to learn while having fun. A structured activities program provides students with daily opportunities for exploring the local area and socializing with other students from all over the US and the world. Weekend field trips allow students to experience the best of the San Francisco Bay Area. Previous trips include Golden Gate Park, Capitola Beach, Muir Woods, SF MoMA, the Exploratorium and many others.

**MIDDLE SCHOOL PROGRAM**
The EPGY Summer Institutes Middle School Program brings together current 6th and 7th graders (ages 11-13) for two weeks of intensive study in one of five subject areas: Creative Writing, Expository Writing, Mathematics, Physical Science and Computer Programming. All courses include content not typically taught at the middle school level, providing enrichment for motivated students who love to learn.

**HIGH SCHOOL PROGRAM**
The EPGY Summer Institutes High School Program provides intensive study opportunities for current 8th through 11th graders (ages 14-17). EPGY courses take students above and beyond what they see in a typical high school classroom, and dive deeply into college-level content and instructional style. Rigorous, challenging courses cover a wide range of subject areas: Creative & Expository Writing, Humanities, Mathematics, Computer Science, Physics, Business, Economics and Social Science.

**INSTRUCTIONAL STAFF**
Summer Institutes instructional staff are primarily Stanford instructors, including advanced graduate students, postdocs and others with Stanford affiliations.

**RESIDENTIAL STAFF**
EPGY students are supervised by Residential Counselors, who fill the dual role of camp counselor and teaching assistant, allowing students to fully immerse themselves in both the academic and social aspects of the program, and help create friendships that can last a lifetime. Through living and studying with counselors who themselves attend Stanford, EPGY students get a unique insider’s look into Stanford life.

"The on-campus residential experience was invaluable. We have noticed a new-found confidence in our daughter when she discusses leaving for college next fall and we believe her positive residential experience at Stanford definitely helped establish that confidence."

— Beth Marcus, 2008 EPGY Summer Institutes Parent

"An Experience Like No Other"
